

96-core fiber distribution box arrangement

Overview

96 core fiber access termination box is able to hold up to 96 subscribers. It integrates fiber splicing, splitting, distribution, storage and cable connection in one. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. IEC/TIA/EIA compliant for reliable FTTH deployments. It is designed not only for distribution but also to support uncut cable extensions. This versatile design accommodates both uses. ODF unit box can be individually equipped with fiber optic distribution frame, but also with the digital wiring. Grandway's Fiber Termination Box provides a high density wall mounted solution for next generation networks, which aims to provide and manage maximum numbers of fiber termination in a limited space.
