By progressing sequentially. VIAVI offers the best Visual Fault Locators (VFL) on the market that easily diagnose and troubleshoot so you can repair problems in your fiber cables. Visual fault locators for fiber bends and breaks, localization of damages and end-to-end continuity check. It can also be used along with an OTDR tester to find a fault with greater accuracy. A clip-on identifier is not strictly a fault locator, but is. Optical Time Domain Reflectometers (OTDR) provides graphical data and analysis along the entire length of a cable, way beyond the reach of a VFL, but they can be expensive and require more time to and skill to operate.
