

Anti-tracking certification for integrated wiring harnesses

Overview

The wiring harness program by UL is a UL traceability program that promises the UL Certification of processed wire. This program enables manufacturers of finished goods to accept wiring harnesses from third-party manufacturers. It creates a clear record, from sourcing to delivery, that confirms each step meets the requirements of a controlled process and. As industries advance in automation, electrification, and global regulatory alignment, adhering to recognized wiring harness standards is essential—not optional. Standards such as IPC/WHMA-A-620, ISO 9001, IATF 16949, and AS9100 wiring harness protocols are central to building safe, high-performing. In this guide, we'll cover key wire harness standards and certifications - from international norms (ISO, IEC, IPC/WHMA) to regional approvals like UL (USA), CSA (Canada), CE (EU), and VDE (Germany). Along the way, we'll keep it practical and relevant for automation, heavy equipment, and robotics. Follow-up communications focused on high-value company updates, specifically highlighting the launch of a new Philippines-based factory and updated quality certifications, directly aligning with the customer's known interest in global supply chain flexibility. ****Result:**** Maintained a professional. ducts as part of its Follow-Up Services Procedures. Determining compliance of materials and components used in UL.
