

Apc cold joint sub-brand

Overview

This APC product line has been rebranded; for current models and pricing, see the Schneider Electric Cooling page. APC Cooling Solutions for IT equipment are designed for a range of systems, from network closets to large data centers. Micro Data Centers provides all the reliability, resiliency, and security of a traditional whitespace in a single enclosure solution for Edge environments. The goal of any data center cooling system is to remove the heat. APC by Schneider Electric (formerly American Power Conversion Corporation) is a manufacturer of uninterruptible power supplies (UPS), electronics peripherals, and data center products. In 2007, Schneider Electric acquired APC and combined it with MGE UPS Systems to form Schneider Electric's. In the beginning (or at least when I begun as a lowly Network Admin in 1993) I learned of APC because they made our server room UPS (Symmetra 40K), our rack PDUs, and later our desktop UPSs. We used their PowerChute software to turn off servers whenever there was an outage.
