

## Are cable trays sealed and waterproof

### Overview

Moisture & Debris Protection: Raceway systems offer sealed enclosures that prevent water, dust, and contaminants from reaching cables. Structural Strength: Cable trays support heavy cable loads while maintaining airflow to reduce overheating. It can also help to keep out birds, rodents and insects. Here's a look at some of these standards: We test cable trays for water and dust protection in two main ways: Laboratory Testing: We do this in a controlled lab. Designed to withstand weather, UV rays, moisture, and temperature fluctuations, these solutions ensure long-lasting performance for power, control, and data cables routed. WSP weatherstops are designed to seal penetrations of any type in walls or floors by cable tray, cable conduit, pipe and/or bus duct.
