

Blended optical cable

Overview

A hybrid fiber optic cable integrates optical fibers and electrical conductors in one unified structure. DuetConnect Hybrid Copper-Fiber Cables allow one cable to offer the advantages of DC power and fiber, safely delivering both over long distances to remote locations where standard power is unavailable or too costly to install. Copper power conductors, usually low-voltage DC to supply the kind of device used in remote radios or IP cameras. Easily create a bill of materials list. The combination of top-tier fiber and copper in the same cable provides high bandwidth data and power under one jacket, reducing overall installation cost Optical Cable Corporation (OCC), a leader in high-performance cabling and connectivity solutions, has expanded its Slimline Hybrid Powered Fiber. We offer full-service OEM and ODM solutions for fiber optic cables, assemblies, and connectivity products — from design and prototyping to global production and logistics.
