

Blue n marking on the distribution box

Overview

TL;DR: L stands for Live (hot) — the conductor carrying voltage from the source. E or the ground symbol indicates Earth (equipment ground). These labels appear on appliance terminals, consumer electronics, and imported equipment. Have you looked at the wires in your circuit?

This guide will tell you what the labels and colors mean. Each wire is labeled accordingly because it. wiring - Is there a way to identify which wire is L and which is N on an appliance (the electrical device itself, not the wall socket)?
