

Can an 8-port switch be connected to a fiber optic cable

Overview

Q:Is there a port that can be directly connected to the fiber optic cable?

A:Do not. Do you have any questions or concerns?

Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. Can someone suggest an 8-port SFP switch to connect all these locations together?

(I am looking for an 8-port SFP (or SFP+) switch, NOT RJ45, UTP or any other kind of copper solution) The Catalyst 9300 is way. This article aims to provide a comprehensive understanding of how network switches are connected to fiber optic cables, the types of fiber optic connectors used, and the configuration processes involved. One standout feature of this switch is its incorporation of ring function based on the Media Redundancy Protocol (MRP), ensuring network redundancy. The device can access either of two other 8 channel devices connected to the "A" (Group A) and "B" (Group B) ports with 8 strands of fiber each with 8 LC simplex connectors.
