

Cooled splice for pigtail

Overview

The optical fiber cold joint is used when two pigtails are docked. Executive Summary: A fiber optic pigtail is one of the most commonly specified yet least understood components in structured cabling. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a. A fiber pigtail is a short length of optical fiber that comes with a high-quality, factory-polished connector already installed on one end, leaving a length of exposed glass on the other. Mass Fusion Pigtails come with all 12 fibers terminated and a ribbonized.
