

Csfpge optical module

Overview

This CSFP module supports both GE and FE speeds and is suitable for single-mode fiber connections. Featuring wavelength specifications of Tx1490/Rx1310nm, it delivers up to 20km of transmission distance with an LC connector. Perfect for extending network reach with high reliability. SFP-type and BiDi SFP-type optical modules are very popular and widely used in optical communication, while CSFP (Compact Small Form-Factor Pluggable) optical transceivers are much rarer. In this article, we would like to explain the main difference between SFP, BiDi SFP, and Compact SFP, mention. The CSFP-GE-FE-BXD1 1000BASE-2BX-D LC Duplex cSFP compatible with Huawei has a receiving function (receiver with 1310nm) and a transmitting function (transmitter with 1490nm) for the transmission of optical signals via multimode fiber, taking the respective transmission protocol into account. This single-mode module operates at a wavelength of Tx1490/Rx1310nm and supports a data transmission distance of up to 10km, ensuring reliable connectivity for. High quality Huawei CSFP-GE-FE-BIDI4 100/1000BASE-BX CSFP Optical Transceiver GE/FE 40km LC from China, China's leading product market fiber optic sfp module product, with strict quality control sfp optical module factories, producing high quality sfp optical module Products. Upgrade your network switches with various CSFP Transceiver.

Types of Optical Modules

Multimode optical modules are used with multimode fibers. Multimode fibers have lower transmission performance than single-mode fibers because of modal dispersion, but their costs are also lower.
