

Dimensions of the lintel for the reserved opening in the distribution box

Overview

The width of the lintel could be equal to the thickness of opening & depth in the range between $1/12$ to $1/8$ of the span. Minimum width of 80mm should be provided. Founded in 1958, IG Lintels is a division of Europe's largest manufacturer of steel lintels and masonry support systems. Like the beam which transfers the loads from slab & walls. A Lintel Size Calculator is a tool for preliminary planning that provides a basic estimate for the size of a lintel required to span an opening. Lintels serve to distribute the load carried by the wall across. sharper than those of mild steel lintels ! Use of g oves is recommended to handle the lintels ! The weight of some lintels may require the use of a crane; rotect fabric strops from the sharp edges ! The lintels may contain CFC-free polystyrene or Rock efer to our technical dept.
