

Distribution box not centered

Overview

top and left correspond to the top-left corner of your box. Example for a 300x200. the box is not directly in center. What you're trying to do is have them correspond to. With CSS, you can center elements (horizontally, vertically, or both) with several methods, depending on the type of element. Center a div element using flexbox: There are several ways to horizontally align elements: Vertical centering can be achieved. In this video we'll look at three of my favorite ways to center items, We'll use positioning, then we'll use flexbox, and lastly, we'll use my go-to CSS grid. It's really such an odd thing that it was so difficult for so long to simply place items in the center of a. In this recipe, you will see how to center one box inside another by using flexbox and grid, centering content both horizontally and vertically. BTW, you can shorten it using grid with place-items or place-content display: grid; place-items: center; height: 100vh; It is also unlikely you would want the body content to be in a row direction. Today, thanks to powerful CSS tools like Grid and Flexbox, achieving the desired centering effect has become much easier. I found it particularly challenging to center a div that is positioned absolutely.
