

Distribution box protection level 68

Overview

An IP68 fiber distribution box is a sealed outdoor enclosure that protects fiber splices, connectors, and adapters from environmental stress. The “IP68” designation means that the box is both completely dust-tight and waterproof for long-term submersion, according to IEC 60529. IP stands for Ingress Protection (also sometimes called Ingress Rating or Ingress Level), defined under the IEC 60529 standard. The “IP” is followed by two digits (sometimes extended with letters), denoting protection levels against solid ingress (dust, particulates) and liquid ingress (water. IP68 Enclosures, Boxes, & Cases are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for IP68 Enclosures, Boxes, & Cases. An IP67 enclosure or IP68 electrical equipment has a first digit of 6, meaning the enclosure is completely dust tight. IP68 does not mean “universally waterproof. Those limits are set. About this item - Junction box waterproof: professional waterproof design, waterproof up to IP 68 (tested with 20 meters water column for 150 hours). Glow wire test - 750 °C Temperature range - -30 °C - 100 °C Installation temperature - -5 °C - 60 °C Filling - Silicone Material -. Buy direct from the manufacturer heavy duty waterproof industrial enclosures, junction boxes, terminal boxes.
