

Dual-tube dual-core armored fiber optic patch cord

Overview

High-performance LC armored patch cord designed for optimal signal transmission in multimode applications. Corning's Armoured Patch Cords exhibit the same outstanding performance as the standard patch cords. The Armoured cable features an interlocked stainless steel tube taped over a buffered fibre, which is surrounded by a layer of aramid yarn and an outer jacket to better protect the cable. Available in lengths of 150m, 200m, 250m, and 300m to suit various installation needs. We carry OM4 and OM3 fiber optical jumpers, 50/125 10G, 40G, 100G, LSZH rated and more. Built with a rugged steel armor layer, these cables are engineered to resist crushing, impact, and rodent. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system.
