

Environmental Standards for Distribution Boxes

Overview

The PPWR specifies that packaging must contain a certain percentage of recycled material. The new EU Packaging and Packaging Waste Regulation requires packages to be labeled appropriately to make recycling. Picture walking through a lush forest, breathing clean air while the electrical infrastructure around you hums quietly, safe in the knowledge that every component in that distribution box nearby was created without harming our planet. That's the promise of RoHS and REACH compliance in electrical. It defines and categorizes common packaging materials, highlighting common and problematic packaging materials options and possible alternatives for replacement. Aim for a full-circle supply chain. It is the expectation of Adient that all suppliers of Direct Materials and quality relevant indirect suppliers comply with all of the requirements and are available to all team members.
