

Fiber-to-electricity module for Huawei 10 Gigabit servers

Overview

Overview: The Huawei SFP-10G-BXU1 compatible SFP+ transceiver module provides a reliable and cost-effective solution for 10 Gigabit Ethernet connections over single-mode fiber, ensuring seamless integration into Huawei networking environments. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Single-fiber bidirectional (BIDI) optical modules must be used in pairs. 3-2002, SFF-8431 and IEEE SFF-8432, supporting 10Gbps data rate up to 30 meters reach over category. Each 10GBASE-T SFP+ transceiver module is individually tested to be used on a series of switches, routers, servers, network interface card (NICs) etc. Apply to Huawei SX700, SX300 series campus switch CE series data center switch. SFP-10G-USR (part number 02310MNW) is Huawei's designation for a 10G short-reach SFP+ transceiver operating at 850 nm over multimode fiber. Compatibility: Fully compatible with Huawei equipment.
