

Fiber to the building connection to a wired router

Overview

For a fiber optic connection, you need an optical network terminal (ONT), a router, and appropriate Ethernet connections for wired devices. Your service provider typically supplies the ONT, but you may need to purchase enterprise-grade routers and switches for. In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. Fiber optic internet is generally installed in the following 5 steps, which we'll dive. Fiber to Ethernet media converters adapt between a typical RJ-45 copper Ethernet cable and fiber-optic cable. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
