

Gigabit fiber optic cable bandwidth

Overview

Bandwidth shows how much data your fiber optic OM1 through OM5 cables can handle each second. Picture a highway—wider roads carry more traffic. Each OM generation boosts this capacity. OM1 fiber delivers 200 MHz·km maximum bandwidth. Your data speeds max out at 10 GbE for just 33. There are five physical layer standards for Gigabit Ethernet using optical fiber (1000BASE-X), twisted pair cable (1000BASE-T), or shielded balanced copper cable (1000BASE-CX). Put another way, fiber optic internet has over 1000 times more bandwidth than. Bandwidth is the maximum amount of data that a connection can transmit at any given time - often measured in either gigabits per second (Gbps) or megabits per second (Mbps). Anything. Some regional providers, like EPB in Chattanooga, TN, offer speeds all the way up to 10 Gbps, and multi-gig plans are available from most fiber internet providers.
