

High-price purchase of optical module equipment

Overview

Branded vendor modules (Cisco/HPE/Juniper) can be priced substantially higher through official channels, while compatible SFPs sold on marketplace and third-party distributor sites commonly retail for single-digit to low-two-digit US dollars per unit. Understanding the cost of optical modules has become a formidable challenge for IT and procurement professionals. 52 billion by 2032, at a CAGR of 8.0% during the forecast period 2025-2032 MARKET INSIGHTS The global Optical Module Chip Market size was valued at US\$ 823 million in 2024 and is projected to reach. For large-scale AI data centers deploying thousands of optical modules, total cost of ownership (TCO) analysis becomes critical. This comprehensive guide explores the complete cost structure of 800G optical modules, from initial acquisition through operational expenses and end-of-life disposal. The global pluggable optical module market was valued at \$9.6% during the forecast period from 2026 to 2034. This robust growth trajectory is underpinned by an unprecedented. In the field, engineering teams are discovering that saving \$50 on a grey-market module often results in thousands of dollars of lost throughput due to uncorrectable FEC (Forward Error Correction) failures. The potential shifts in the 2025 U.
