

How much does cable tray cost per meter in an apartment building

Overview

Steel trays typically cost between \$5 to \$25 per meter. They are strong, durable, and widely available, making them ideal for general-purpose electrical installations in residential, commercial, and industrial settings. Costs vary based on tray material (steel, aluminum, or fiberglass), size, design (ladder or solid bottom), and installation complexity. Additional elements like supports, connectors, and brackets. The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. That number matters, but it's rarely the one that decides whether a project stays within budget. Joe quickly realized the difference between spending 15 EUR/meter on rigid conduit versus 9 EUR/meter on cable trays would mean thousands of euros saved on the project - but only if installation complexity didn't add hidden costs.
