

# How to connect a dual-port optical module

## Overview

To connect an optical cable to an SFP module, use the appropriate patch cord (e., LC-LC, SC-LC, etc). The patch cord must match the fibre type – single-mode or multi-mode. Once connected, verify that the port activity indicator is on and run diagnostic commands to check the. Small Form-factor Pluggable modules (SFP module) are the workhorses of modern network connectivity, enabling flexible fiber optic or copper links between switches, routers, firewalls, and servers. It's essential to understand how to properly install and configure an SFP. This section describes how to install optical transceivers on the SFP or SFP+ ports and connect them to the ports of the peer device using optical fibers according to the network plan. The USG supports both 1 Gbit/s, 10 Gbit/s, and 40 Gbit/s optical modules. 25G SFP28: Designed for 25G data center links. Clean the fiber end face to avoid dust contamination, align the LC connector with the.
