

## How to prevent tripping over cable trays

### Overview

Use cable ramps to prevent trip chances. Ensure all cables are kept away and clear from water or any other materials that may come into contact. To properly prevent trip hazards from cables: Problem: loose cable across floor. Solution: properly specified cable protector. Result: reduced injury risk and safer movement through the space. In indoor environments, cable trip hazards often appear temporarily: For these situations, lightweight. Whether you're looking to hide a power strip, protect a cable crossing a walkway, or stow a rat's nest under a standing desk, the best cord management approach depends on matching the right hardware to the exact location and cable volume you're dealing with. Picking the right cord management. By investing in proper cable management products and planning your structured cabling systems smartly, you can prevent cables from becoming tangled or a trip hazard. Ensure that all employees working on site are paying extra attention to route cables and hoses in order to eliminate the risk of tripping.
