How to repair a cracked fiberglass nylon tail

Overview

Repairing a crack in fiberglass involves drilling a tiny hole at each end of the crack to prevent further extension, widening the crack slightly with a rotary blade for better epoxy application and filling the crack with fiberglass epoxy resin using a plastic applicator. To fix fiberglass that has cracked, you must first assess the extent of the damage and then prepare the surface. Assess. #boating #boat #fiberglass #gelcoat #boatrenovation #composite #rvlife #car #composite #jetski #sailing #automobile #rvrenovation #diy #fiberglassrepair #foam #storage #coosa #stringers Amazon Store: https://amzn. to/4hFw3AV As an Amazon Associate, I earn from qualifying purchases.
