

How to tie ropes to fiber optic cables

Overview

Use gentler options: Hook-and-loop, low-tension, and releasable ties protect fibers. I'm using to pulling electrical wire and even ethernet through conduit, so I'm ready with a nice free-spinning setup for the new fiber cable to make sure it feeds smoothly into the 1" conduit. Fiber optic cables have Kevlar aramid yarn or a fiberglass rod as their strength member. On long runs, use proper lubricants and make sure they are compatible with the cable jacket. Separate the aramid yarn into two bundles and loop it. Yes, cable ties can be used for managing fiber optic cables, but it is crucial to select the right type of cable ties. During installation, all curvatures should be smooth. Turn-backs and all sharp changes of direction. The SPEEDWRAP® Brand FIBERTie™ product line includes cut-to-length tapes and fabricated cable ties.
