

## Huijue 144-core fiber distribution box

### Overview

The SJ-ODB-M18-B metal fiber optic termination box is a durable, compact solution for managing and distributing up to 144 fiber optic cores, ideal for outdoor use in large-scale network installations. It is suitable for metropolitan optical fiber access networks and FTTH/FTTB terminal optical fiber distribution. It is widely used in outdoor overhead and floor-standing installations to meet the needs of urban broadband, 5G fronthaul and other scenarios. Note: Specifications are subject to change. Huijue Net integrates prefabricated buildings and intelligent modular data center technologies. Integrating intelligent temperature control, power supply, lithium battery and AI technology Huijue Net cabinet adopts modular design, simple installation, easy expansion, rich accessories, and meets the. Fiber distribution box is widely used as a termination point for the feeder cable to connect with drop cable. The fiber splicing, splitting, distribution can be done in this box, and meanwhile it provides solid protection and management for the FTTx (FTTC,FTTB,FTTH,FTTP,FTTZ,FTTN,FTTO,FTTSA). Huijue Communication Equipment specializes in producing ODN product series, including jumperless optical cross-connect cabinets, optical fiber distribution boxes of various core counts, optical cable joint closures, termination boxes, and other optical distribution network equipment.
