

Kenya Broadband Fiber Cable

Overview

Speaking while presenting the 2025/2026 budget estimates in Parliament on Thursday, National Treasury CS John Mbadi announced that the government has laid an additional 4,690 kilometers of high-speed fiber optic cable—enhancing broadband access in previously underserved counties . Speaking while presenting the 2025/2026 budget estimates in Parliament on Thursday, National Treasury CS John Mbadi announced that the government has laid an additional 4,690 kilometers of high-speed fiber optic cable—enhancing broadband access in previously underserved counties . Kenya has expanded its national fibre optic network to 13,590 kilometres in 2025, up from 8,900 kilometres in 2022, marking a significant stride in the country's digital infrastructure rollout. At this moment the project is 50 per cent complete with a total of 1,300 kilometres of fibre optic connectivity already. It's a 10-billion-shilling program launched by Kenya's government to offer 100,000 km of fibre optic cables to every nook and corner within the country's borders. The objective is to improve connectivity, especially in underserved and high-risk areas. This fibre optic network is part of the Horn of Africa Corridor Development Project (HoAGDP). It will serve the counties of Isiolo, Meru. The government has set its sights on a bold initiative to provide internet access to 8. Telecommunications Principal Secretary, Edward Kisiang'ani, revealed the ambitious plan during the. Fiber optic cabling involves the transmission of data through thin strands of glass or plastic fibers, using light pulses.
