

## Latvia ODM LPO Optical Module OSFP

### Overview

Compact BlueOptics OSFP twin-port transceiver P49762-B21-BO provides two 400GBASE-SR4 channels over multimode fiber with MPO/MTP-12 APC connectors. Operates at 850 nm for up to 50 m on suitable MMF and supports digital diagnostic monitoring (DDM). This specification defines the electrical connectors, electrical signals and power supplies, mechanical and thermal requirements of the OSFP Module, connector and cage systems. The OSFP Management interface is described in a separate document, Common Management Interface Specification for 8/16X. The following analysis dives into the technology behind OSFP optics, performance evolution across speed classes, deployment considerations, and how LINK-PP, as a full-stack optical module manufacturer, supports high-density interconnects with complete optical, electrical, and mechanical. HIGH-SPEED OSFP TRANSCEIVER FOR 800G/1. 6T WITH 200G PER LANE Amphenol's 200G/lane optical modules support DR4, FR4, 2xDR4, 2xFR4, AOC, and breakout AOC configurations with LC or MPO ports, ideal for 800G/1. Fully compliant with OSFP MSA, IEEE 802. Designed for high-density 400 Gbps links in data. OSFP (Octal Small Form-factor Pluggable) modules are becoming increasingly important in achieving high-speed optical connectivity in the fast-growing world of data communications. Each module needs a small but precise set of support ICs — multi-voltage conversion, hot-plug load switching, rail supervision, and signal level shifting.
