

Libyan large-core optical fiber G 657A1

Overview

EasyBand® G657A1 bending insensitive single-mode fibre encompasses all the features of FullBand® fibre and provides good resistance to macro-bending. It has low macro-bending sensitivity and low water-peak levels. ast right-hand digit when considering the specification limits. This method is in accordance with the rounding method of ASTM Practice E29 (Standard Practice for using significant diITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G. A1 or A1 fiber compatible cable is a reliable high- performance single-mode fiber. They are ideally suited to the system requirements of LAN networks with the lowest. G657A1 is a single mode fiber type optimized for special application scenarios (higher fiber density cabling requirements), and belongs to the ITU-T G.
