

Mauritania lays fiber optic cables

Overview

Mauritania launched the coastal installation of its second submarine cable, with full deployment scheduled for August 2026 and service expected in January 2027. The cable will deliver an initial capacity of 200 Gbps, scalable to 12 Tbps, linking the country to Europe and South. EllaLink announced the execution of agreement with the Ministère de la Transformation Numérique et de la Modernisation de l'Administration (MTNMA) of the Islamic Republic of Mauritania for the construction, operation and maintenance of a second international subsea cable that will directly connect. Mauritania is set to establish a second international subsea fiber optic cable connection through an agreement signed between the country's Ministry of Digital Transformation and Public Sector Innovation and cable operator EllaLink. The coastal segment of the new fibre-optic cable was installed on May 4 in.
