

NEL Optical Module

Overview

The NEL NLK1551SSC directly-modulated laser (DML) is a cost-effective solution for 10 Gb/s digital transmission of up to 50 km using traditional intra-city fiber links. NEL, a leading supplier of coherent Digital Signal Processor (DSP) solutions to system and module manufacturers worldwide, provides key components for 100G-and-beyond coherent transceivers, ExaSPEED Family (DSP chips for optical communication), Photonics of NTT Innovative Devices. The package contains a high-speed DFB laser chip, thermoelectric cooler, thermistor, optical isolator, and a rear-facet monitor. 2X1 optical rotator and combiner : Integrate polarization rotator and PBC into one chip using highly reliable Silica-on-Si PLC technology. Available wavelength range between 1260 nm and 2340 nm. NEL offers a vast array of products in the information. A driver integrated modulator module for digital coherent optical communication using an InP modulator chip featuring high speed, low loss, and low drive voltage. Supports modulation speeds up to 140Gbaud based on OIF-HB-CDM-02. NEL is the pioneer and market leader of 50GHz Athermal AWG which is achieved high performance by optimized design and precise fabrication.
