

## Niger distribution box grounding terminal

### Overview

26 mm<sup>2</sup> (10 AWG) ground wire must be used, and in all other markets a 6 mm<sup>2</sup> must be used. Schneider Electric NSYEBs are enclosed IEC power distribution blocks that are available with copper or aluminum lugs. They are one-pole modular units with an interlocking dovetail feature that enables ganging of the blocks to create multi-pole configurations according to application requirements. Fairtex Group has experiences in the field of Explosion Proof Equipment and ATEX products, OEM design and manufacture completely new range of products suitable to be used in any hazardous area such as chemical, petrochemical and pharmaceutical industries, Oil & Gas onshore/offshore plants. Use grounding terminal blocks instead of grounding studs and wire lugs to terminate ground wires, saving installation and wiring time. Grounding terminal blocks clamp mechanically onto the DIN Rail by tightening the center mounting screw, making a reliable electrical connection between the cage. Safely conduct, connect and distribute energy in hazardous areas with R. Add blocks for thermocouples, fuses, and grounding wire as needed. Each DISTRIBUTION BOX and controller must be grounded. Grounding of the units: Attach a ground wire from one of.
