

Nordic fiber optic hybrid cable 2 cores

Overview

This cable is constructed with 2 core 16 AWG copper conductor cable & 4 Core tight buffered fibre cable with LSZH (UV resistant) jacket for internal/external applications. Hybrid cable technology offers low installation and labour cost by requiring just a single cable pull. Helmacab offers both loose tube and slotted core based hybrid cables. Conductors: Typical structure consists of 6 to 18 conductors for 3 to 9 radios' power supply, sizes 6-16 mm² or #8 - #4 AWG conductors. Customized structures: A single. DuetConnect Hybrid Copper-Fiber Cables allow one cable to offer the advantages of DC power and fiber, safely delivering both over long distances to remote locations where standard power is unavailable or too costly to install. Uninterrupted monitoring of large infrastructure for increased safety and targeted preventative maintenance.
