

One fiber optic cable connects two routers

Overview

Yes, you can connect two routers to one fiber modem, but understanding the 'how' and 'why' is crucial for optimal network performance. I'm planning to use a TP-Link MC220L transceiver to convert the optical signal to ethernet. This ethernet will then go through a 1 Gbit/s switch, and route two ethernet cables to each floor. On each floor each ethernet cable will be connected to a router, which will then distribute the internet. Are all the strands in the optic fiber cable gonna work at the same time and are they compatible with the transceivers?

Thank you yes, for single-mode modules, you'll need single mode fiber/cable. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX.
