

Power cables and fiber optic cables are stored together

Overview

General Consideration: It is generally not recommended to run fiber optic cables in the same conduit as electrical power cables. This is due to several potential risks and complications that can arise from such an arrangement. Utilities build fiber optic. "When setting up a new communication network or electrical system, one common question arises — can fiber optic cables and power cables run together?

" "The answer is yes, they can — but only when certain safety and technical guidelines are followed. " "Fiber optic cables are different from copper. The main problem is accessing/maintaining the fibers later if there is a dig-in or other problems. There are no technical concerns. If this is an industrial facility where all maintenance is the responsibility of one entity, I wouldn't have too many concerns, but I would think about ways of. The existing 2" conduit contains 4x 1/0 XLPE cable (rated for direct-burial), so I plan on pulling outdoor rated, non-metallic fiber through the same conduit.
