

Rebooting Data Center Racks

Overview

Click the arrow next to Shut down and select Restart from the menu. If your server is not responding or was shut down manually, perform a hard reboot by using the Cloud Control Panel to simulate power. Run the following commands to list the pods, cluster operators, and nodes. Check that the Fusion Data Foundation cluster is in a healthy state. In the Status card of the Overview tab, click Storage system. **WARNING: A WARNING indicates a potential for property damage, personal injury, or.** For the command you should use to soft reboot your server, see the appropriate section for your server operating system: Select the method that matches your installation: Open Settings in the Charms Bar. Click the arrow next to Shut down and select Restart from. Run the following commands to ensure that the storage pods are up: Global Data Platform Switch namespace to ibm-spectrum-scale: oc project ibm-spectrum-scale Verify whether all pods are in running state in the ibm-spectrum-scale project: oc get pods To run commands on a node, run the following rsh. Two weeks ago StruxureWare Data Center Expert 7. Help, please, find the problem. Authentication Ticket Mismatched. Server racks, far from being simple metal frameworks, provide the vital infrastructure for arranging, cooling, securing, and supporting all computing hardware and networking devices. 1 Organising IT Equipment for.
