

## Revit annotation of cable trays

### Overview

Click Systems tab Electrical panel Cable Tray. On the Options Bar, specify the width, height, offset, or bend radius. On the ribbon, verify that Tag on Placement is selected to tag the cable. The Cable Tray Settings pane contains the following: Use Annot. Scale for Single Line Fittings - Specifies whether cable tray fittings are drawn at the size specified by the Cable Tray Fitting Annotation Size parameter. In revit we can only use cable tray in both forms below: But I would like to represent it like this: Is there a way I can do that?

In preference, I don't want to use filters, and I would like to show the perforations in every view. WireInConduit is a plugin for Autodesk Revit, this tool facilitates the creation of wiring annotation using the electrical circuits to launch wiring in conduits and cable tray. In addition, it performs the quantity of cables automatically and configures each type of wiring, with a description of. The EAE Cable Tray plugin allows users to employ EAE Electric's cable tray products in their Autodesk® Revit® projects using the most up-to-date data. for that I have Modified default tray Tag family as per my requirement. in my Model there are many Trays and it is very much lengthy and time consuming task.
