

Russian optical modules

Overview

Rostec State Corporation's Roselektronika Holding has developed the first Russian silicon-based photomodules with a resolution of 4 megapixels. The products are designed for machine vision and video monitoring systems that can be used in extreme conditions, such as in the Arctic. We are the only company in Russia providing a full technological cycle. Joint-stock company "NOLATECH" (New Laser technology) - leading enterprise in the field of development and manufacturing of semiconductor lasers and laser modules for a fiber optic link including WDM, and also for other fields of application. The excellent characteristics of laser modules have. Optical Products Factory, LLC is a reliable manufacturer which delivers a service all over the world. Shvabe holding included in the Corporation is focused on this area.
