IPv6-ready Explore our range of high-quality GPON, EPON, and XG (S)PON OLT products. Find the perfect Optical Line Terminal solutions for your network needs. Modern OLTs offer communication service providers (CSP) the ability to launch multigigabit services to tens of thousands of subscribers from a single location or just ten. Packaged in a Small Form-structure in edge, enterprise, or distributed environments. On the uplink side, it operates. Join Stephane Cloirec, Vice President, Video Appliances & Software Product Management at Harmonic, for an on-demand webinar exploring the future of DTV+ — and what it means for viewers and broadcasters alike. OSNtv enhances monetization of linear streaming channels with Harmonic's SSAI solution. Gigabit Passive Optical Networks (GPON) is the leading technology being used in FTTx (FTTH) deployments. PON is different than other optical network topologies in that it is a Point to Multi-Point (P2MP) topology. It can support 512 ONU under 1:64 splitter ratio.
