

Suspended sloping ceiling cable tray

Overview

What is a suspended ceiling cable tray?

A suspended ceiling cable tray is a support system installed below a ceiling structure to organize and route electrical, data, and communication cables. It provides accessible, safe, and neat cable management in commercial and industrial. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment. Our cable support. Our Design Trays provide stylish cable support that can be integrated into the suspended ceiling. To ensure that the fastenings for the Wire-tray Trunking systems also meet these requirements, we have designed them with minimum horizontal surfaces. This means. For this installation system for circuit integrity maintenance in E30 - E90 according to DIN 4102 Part 12, RLVC cable trays with an rail height of 60 mm in widths of 100 to 300 mm in stainless steel quality 1.
