

# Temporary distribution box grounding terminal

## Overview

26 mm<sup>2</sup> (10 AWG) ground wire must be used, and in all other markets a 6 mm<sup>2</sup> must be used. High-quality insulated brass earth terminal block ideal for safe electrical grounding. OEM and custom configurations available. Each DISTRIBUTION BOX and controller must be grounded. Grounding of the units: Attach a ground wire from one of. When you're building an electrical panel, a grounding terminal block is one of the most vital safety components you'll install. It's the central hub designed to safely channel dangerous fault currents away from your equipment and, more importantly, away from your personnel. These boxes prevent dangerous current buildup, reduce the risk of electric shock, and ensure system stability by providing a. Temporary protective grounding may include using a grounding cluster equipped with clamps which are connected to each de-energized phase bus and to the equipment grounding terminal bar.
