

# The fiber optic cable card cannot be used on the router

## Overview

The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Hello there, i am trying to simulate a connection of two routers cisco 2911 routers in packet tracer with optical fiber however i get an error message, " The cable cannot be connected to that port", what could be the problem or procedure on using optical fiber connection between routers. Also when. However, during the connection test, I encountered the error you can see in the attached image. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled. This morning my ISP upgraded my Internet connection from a standard coaxial cable and Cisco modem to a fiber optic cable and Hitron modem Model Name NOVA-2004. Despite multiple attempts, the Archer AX6000 v1.
