

The switch can connect to 2 fiber optic cables

Overview

Short answer: Usually yes, you use them in pairs, but the “pair” can be a media converter on one end and a fiber switch (or SFP in a switch) on the other, as long as both sides speak the same speed, wavelength, and optical mode. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. But is it possible to connect AB and BC cables using fiber optic patch cords ?

Will it work in this fashion ?

If this can work, I. Those who use fiber to connect switches together what do you use?

Hi everyone I'm looking at buying some SFPs to connect my switches together rather than using the copper ports. I'm debating if MM or SM would be better as I'll be buying the 1g optics from fs. 5m fiber cable as. So I have a business that is in a huge warehouse with 2 data closets, and large POE switches at each location.
