

Two-fiber 8-electric switch type

Overview

What is a 2 fiber port 8 LAN port fiber optic Ethernet switch?

It is a hybrid Ethernet switch that integrates two SFP fiber ports (1. 25 Gbps) and eight RJ45 UTP ports (10/100/1000 Mbps), enabling seamless conversion between fiber and copper networks. This managed switch comes with Ethernet TCP/IP protocol. It comes with 8 copper cable transmission ports and 2 ports for multimode fiber optic. It provides simple and complex connectivity for multiple Ethernet device, network management, enhanced cyber security and more advanced switching features. Classified as power source equipment (PSE), it enables the centralization of the power supply. The Modicon MCSESM103F2CU0 is a standard managed Ethernet switch that includes 8 TX (copper cable) ports using RJ45 connectors and 2 FX -fiber ports that support 10/100/1000 Mbit/s multi-mode communications. Please select the company. mera, WIFI bridge, IP phone and other types of equipment. The product adopts a new generation of high-performance hardware and software platform, provides flexible, cost-effective full gigabit access and uplink ports, supports three-layer routing protocols, complete security protection mechanisms. The IS420ESWAH2A is the best IONet switch model if you need multi-mode fiber ports.
