

US Cold Aisle Cabinet Manufacturer

Overview

In 2024, Worthington Armstrong Venture (WAVE), a joint venture between Armstrong World Industries, Inc., acquired all of the assets of Data Center Resources, LLC (DCR) related to the design and manufacture of customizable, modular aisle. Cold aisle containment creates an enclosed corridor in front of server cabinets, ensuring that the coldest air goes directly into equipment intakes. By isolating the cold aisle, containment reduces unintended mixing of cold supply air with hot exhaust air, maintaining uniform, predictable. For over 30 years our DAMAC product line has been a supplier of tried and true custom data center solutions to the tech sector. We've grown alongside the industry and have the expertise and experience to deliver server racks, cabinets and aisle containment solutions you can rely on. When you're. Explore Tate's modular containment solutions for data centers, including hot and cold aisle systems, hard roofs, doors, and custom partitions designed to improve cooling efficiency and reduce energy loss.
