

# What are the types of optical cable fixing hangers

## Overview

Clamps are essential for securing the cable along its route. Common clamp types include anchor clamps (for terminal points or heavy loads) and suspension clamps (for mid-span or intermediate support). Each clamp type has a different structural design. Our cable hangers are manufactured out of non-rusting stainless steel and UV resistant PP material, they can fit with worldwide. Fiber optic cable clamps are devices used to secure and stabilize fiber optic cables in a wide range of applications, including telecommunications, data centers, and network systems. These clamps provide a secure foundation for the cables, helping to prevent damage and maintain proper alignment and. Hardware is what holds the cable in place and ensures mechanical stability. If these components fail, your entire system can suffer. ) in pole-mounted applications becomes essential.
